JACOB CHAPMAN

1019A Ready Section Road, Hazel Green, AL (256) 606-1573 jacob@chapmansound.com

Professional Summary

Audio-visual systems professional and team leader with 10+ years of experience supporting installed systems, videoconferencing, and network documentation. Experienced in AV-over-IP solutions, control systems design, troubleshooting, and operational support for high-visibility presentations and events.

Professional Work Experience

Audio-Visual Tech. Supervisor, U.S. Space & Rocket Center – Huntsville, AL **Dec. 2022 – Present**

- Support the Audio-Visual Operations Manager with AV system design and project coordination
- Develop and maintain AV network documentation and standard operating procedures for auditoriums, theaters, conference rooms, classrooms, and portable presentation systems
- Configure, test, and troubleshoot Microsoft Teams conferencing systems using Logitech Rally Plus equipment for hybrid executive-board meetings and high-visibility presentations
- Maintain reliable operation of installed AV systems, including Dante, NDI, and Extron NAVigator AV-over-IP solutions, through configuration, inspection, troubleshooting, and repair

Front-of-House Engineer, The Camp at MidCity – Huntsville, AL **August 2022 – Present**

- Coordinate with the production manager to ensure stage layouts, input lists, and stage power locations meet or exceed the expectations and requirements of each performing artist
- Perform sound checks and adjust monitor levels, EQ, and dynamics throughout the show

Director of Audio-Visual Ministry, First Baptist Church – Decatur, AL **Jul. 2016 – Jul. 2021**

- Directed and produced weekly live streamed worship services, coordinating technical production from planning through delivery to YouTube and Facebook Live.
- Produced worship videos and sermon podcasts, combining pre-production, video editing, audio mixing and mastering, and final delivery under recurring weekly deadlines
- Built an isolated broadcast-mix studio and independent FOH/broadcast signal path, improving streaming audio quality and enabling uninterrupted transition to virtual services in March 2020
- Recruited, trained, and scheduled a volunteer technical team, developing repeatable workflows for live broadcast and content production with a standard of excellence
- Managed and maintained campus-wide audio, video, and lighting systems, including repairs and new installation projects when necessary

Education

Bachelor of Science – Entertainment Industry Technology, University of North Alabama **2014**
Minor in Communications (Film and Digital Media focus)
