

JACOB CHAPMAN

1019A Ready Section Road, Hazel Green, AL (256) 606-1573 jacob@chapmansound.com

Professional Summary

Audio engineer and team leader with 10+ years working in live sound, broadcast, and post-production. Skilled at training technical teams and translating client needs into polished, professional results.

Professional Work Experience

Audio-Visual Tech. Supervisor, U.S. Space & Rocket Center – Huntsville, AL **Dec. 2022 – Present**

- Supports the Audio-Visual Operations Manager with project design and weekly operations
- Manages microphones and live sound adjustments for astronaut presentations to Space Camp, operates hybrid VTC audio for formal executive board meetings, and supports A/V production for large corporate events, ensuring clear speech intelligibility in a variety of high-stakes settings
- Ensures accurate, timely set-up, tear-down, and management of A/V equipment across daily operations and community events
- Conducts systematic inspection, installation, and repair of USSRC A/V systems, maintaining safe, reliable operation

Front of House Engineer, The Camp at MidCity – Huntsville, AL **August 2022 – Present**

- Coordinates with the production manager to ensure stage layouts, input lists, and stage power locations meet or exceed the expectations and requirements of each performing artist
- Communicate with the artists before the show to ensure that they are comfortable and have everything they need from the venue to put on their best performance
- Conducts pre-show sound checks and sets stage monitor mixes for each artist
- Measures and adjusts output levels, equalization, and dynamics throughout each performance

Director of Audio-Visual Ministry, First Baptist Church – Decatur, AL **Jul. 2016 – Jul. 2021**

- Directed and produced the weekly live broadcast of Sunday morning services to the web
- Established a broadcast studio to enhance the audio quality of livestreamed worship services
- Coordinated and trained a volunteer team to run various technical aspects of worship services
- Produced special audio and video projects, including worship videos and sermon podcasts
- Managed and maintained all audio, video, and lighting systems throughout the campus, including repairs and new installation projects when necessary

Education

Bachelor of Science – Entertainment Industry Technology, University of North Alabama **2014**
Minor in Communications (Film and Digital Media focus)
